

SPIRITUAL TEACHING IN UNIVERSAL ENERGY

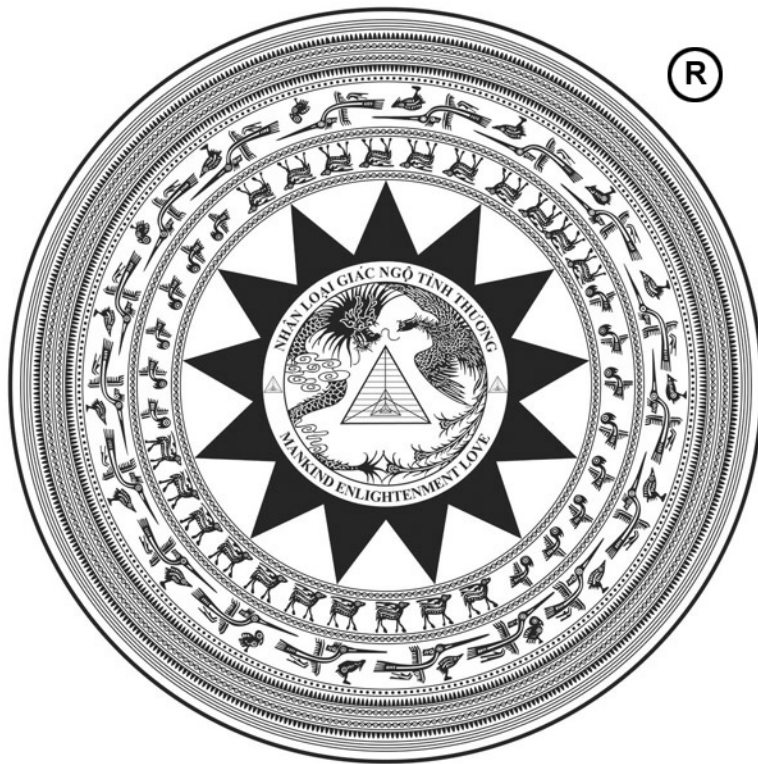

NEW LESSON – NEW SPIRITUALITY – NEW PEOPLE

Prof. Dr. Sir Master LUONG MINH DANG

CHAPTER I: NEW LESSON – LOVE ENLIGHTENMENT MANKIND

CHAPTER II: NEW SPIRITUALITY – THE TRUTH ABOUT HUMAN LIFE

CHAPTER III: NEW PEOPLE – THE ‘UNKNOWN’

CHAPTER I

NEW LESSON – LOVE ENLIGHTENMENT MANKIND

MK: Dear Master, on the occasion of the New Year we wish both of you a very successful New Year in the development of Universal Energy throughout 5 Continents. Also, on this New Year can you share with us something new for this year as you received the messages from the Deities?

Master: During the New Year, both of us send to everybody, humans in all 4 corners of the world the infinite love from the Omnipotent.

So it has been a tradition now! As you requested, I reveal several things to make you happy. This year 2007 will mark a new beginning, in which all humans will have to change even if they do not want to. This is the time of Enlightenment of the human species and the final stage of evolution. We will cross over a new cultural era in which human will have genuine ideas of Wisdom and Enlightenment, and with new energy source. There will be people with incredible abilities that are discovered from deep within their inner self.

In fact, as you know there are not a lot of people in the world population of more than 6 billion, only a small number of them are souls from people who advanced to higher spiritual levels and volunteered to come down to do the bad deeds so you can learn and evolve.

Can you criticize or look down on these people? Can you blame God for being near or far, who created the people closest to you in your own family, including your beloved wife or husband, as they make you suffer? Do you feel resentment towards people who are evil or greedy?

You can see these as people who have highly evolved to make your life easier and broaden your learning path. This is the best lesson on the concept of right-wrong, right-left and evil-good. It is a method that can help you to grasp the philosophical concept of “seeing beyond right-wrong”. They stay where they belong, and you stay where you belong. There will be a time, if your spiritual energy is strong enough then in a split of a second all humanity can have Wisdom and Enlightenment. Today, by destiny you are learning first with me. We learn just a little sooner than the rest of humanity in order to prepare for this most wonderful day in human history. After we complete the missions that were given by the Deities, you and I will silently go on to other assignments, and if there is any fame that may arise, we will leave everything behind for humanity.

I advise you to love the people who are low or evil and always try to help them. Since they sacrifice the part of being better humans in order to be in the role of being low or evil as lessons for humanity to learn and evolve, even their own self may not know that they are working for God.

Learning from a bad experience is a valuable lesson so we can avoid making the same bad or evil mistakes. Only in manner we can evolve according to the natural order. You express your love toward these people by transferring energy, transferring the Light of God's Aura to them. That is the way an UE person can express love, as we have God's energy and we are the new people from the Sixth Continent.

The most important issue is do you accept to learn through these bad lessons in life during this end time or not. So that you can obtain the wisdom from each situation in life to evolve, or to allow people who are linked to you by fate to evolve, and to give yourself the chance to become the new human with new spiritual insights.

In summary, I elaborate further for you on the philosophy of "seeing beyond right-wrong" so you can surpass this difficult psychological obstacle and to be able to obtain the newest lessons the Deities had allowed me to teach you.

It would be very difficult to grasp the newest lesson that God is teaching so you can have new learning, new spirituality and becoming new human, if your own mind still discriminate against rich-poor, low-high, nationality, religion, etc.

On this note, I reveal further to assure you. Eventually there will be many important transformations that have never happened in the entire Universe. Earth is only a part of the body of this universal transformation. If there are people who have to "depart" due to various calamities, then you should consider them as those who are highly advanced. And they complete their missions to give the lessons to humanity and return back to be with the Deities. In fact, it means there are a few of these people. Since humanity wants to evolve and progress according to the direction that God has designed, there is no other choice but to find a replacing energy source, which is Universal Energy (abundant and clean) in order to progress. All of the conventional energy sources (except solar and wind energy) always carry a hidden danger to the environment and life.

The hidden meaning that I have taught you in the past about these bad lessons is: people are bad or we are bad in a way that we do not learn! For all the ages until now people always want to be good, even we are bad we still insist that we are good. So now the Deities let us learn the bad lessons until when we can accept to learn all the bad lessons then it will be done, at that point we can temporarily have wisdom. With Wisdom and Enlightenment we can discover the hidden creative power in humanity and utilize Universal Energy in every aspect of life.

You do not need to love others, you just love yourself first. I repeat again so you are clear: after New Year's Eve 2007 (lunar year) anything that you cannot imagine may happen. At that point you try to help people to overcome the difficult time and you cannot be lazy. Regardless of your Level, when this unexpected moment comes, all the abilities from the Universal Energy techniques suddenly appear within each of you so you can save the people and the world. I remind those of you who are in the lower UE Levels: even though you are in the lower UE Levels but you practice diligently and know how to connect the energy with me, then your low Level will

become high without your own awareness. You should stay calm. I am always with you 24/24 hours daily if you really need me.

You should never think that you are in the low or high Level. Because when that moment comes, any Level is sufficient to save you and other people to overcome the difficult trial. During the “waiting period” you should try your best to practice. The longer this waiting period shows the infinite love from the Deities toward humanity. They patiently wait for their children to reach Wisdom and Enlightenment for thousands of years and including this time as we refer to the End Time of the year 2000. One more time the Deities show their forgiveness to give humans a chance to repent. But it seems that the more the Deities show their love, we continue to do more bad and evil things. So, it may be the right time for everything to happen. I say a little and it is up to you to understand more or less in order to decide your own path of evolution.

MK: Dear Master, you called the year 2006 as the “year of love” in which we received the Divine Love. In the year you taught 3 consecutive UE Levels, that you have not done in the past. Could it be the urgency and our UE School really needs to receive more abilities in order to protect Earth?

Master: You are being greedy again! You never think about what I’ve just answered to your previous question. You keep on asking again. But you need to be careful for having more knowledge just to keep! Yes, last year I called it the year of love and I also said: It is time the Deities do not only give all the love to humans but they also teach humans to know how to love the Deities.

To say correctly, both 2004-2005 are the years we had a lot of difficult trials in UE School and we thought we could not overcome them. But also in these 2 years we learned a lot through the profound lessons from these crises. During these 2 years we received all the love from the Deities together with the keys to utilize Universal Energy that we never knew in the past.

In fact, as a human being sometimes I feel impatient. Luckily, many of you recognize this urgency to cooperate with me in order to quickly receive the new energy of love and new UE techniques to help world in daily changes according to the angle of motion and evolution.

Calamity is the new trial and many of you had quickly learned and practiced to develop spiritually during this sensitive and critical time. Many people had maturely progressed through these 2 years and I am very happy for you. Especially a number of you who knew how to “share the bitter time” with me, I still remember each one of you though your own unique expression. To love me and take care of your own burden to continue with me on the UE path of Mankind-Enlightenment-Love is to love the Deities.

MK: Dear Master, maybe you say it wrongly! Should we call UE School as Mankind-Enlightenment-Love?

Master: It is right not wrong. To say Mankind-Enlightenment-Love is to mention about the philosophical topic, about the meaning of the UE applications in serving human life, society and evolution of all life form. To make it easier to understand, enlightened humans can fully receive God's love in order to continue to develop and advance to newer horizon that is never discovered until now. But to say in a reverse order of Love-Enlightenment-Mankind is to discuss about the path of development or the steps of UE School to serve humanity. Last year was the year of Love. As we already received the love from God, then we should utilize it in our daily life. We help to heal people silently and anonymously. We help to improve agriculture, to clean up the environment, to decrease the damages from natural disasters or wars through our energy transfers with the power of love and Universal Energy. These are the most practical actions in which we can receive God's love.

Only through the acts of love we can obtain Wisdom and eventually reach Enlightenment, which is the second step on our path. Only with enlightenment we can activate 100% the latent abilities from within the ultra-cells inside our brain. At that point, humans will have the enlightenment and talent to help Mankind. If your energy is still weak, then who can you help?

Enlightenment is a word to denote the creative intelligence in people with love and compassion. They utilize their brilliant ideas to serve humanity unconditionally in a silent and anonymous manner. This is the new role model of new people and new spirituality from the Sixth Continent. I repeat again: they work and serve humanity unconditionally and always in a silent and anonymous way. I am in a hurry to train these people so in a near future the world can have peace.

I do not select anyone in particular to this special program. Each of you on your own, if you had voluntarily acted in the enlightened fashion as the role model I mentioned above then you do not need to ask the Deities will select you. Perhaps this is a giant leap so that in a couple of years the UE Academy will be established, in which we do not have short training sessions like now, but we will have longer training programs that are equivalent to university level for UE Master or Doctorate degrees. All the planning still depends on each of your individual effort, and it does not depend on the acceptance of Mankind. This is a new thinking that you should remember it well!

The word 'Mankind' that appears last in the UE path is very meaningful. Do you know why? It is because the Deities still give humans a chance to change our perspective and spirituality, in order to transform according to the changes of the Divine Body, the infinite Universe. If you know to learn UE and utilize God's love, which is Universal Energy in every aspect of your life, then you will not have any fear about the arrival of this unexpected moment, which is the End Time.

On the New Year, I share some happy news. Recently in 01/2007 the scientists had adjusted the clock to determine we are 5 minutes closer to Doomsday. This Doomsday Clock was designed in 1947 since after the Second World War. Each year, depending on the changes of the global climate, scientists had a ceremony to adjust this clock as a warning sign for humanity to know the final day of planet earth.

When people do not want to change their thinking, they still recklessly exploit and deplete all the resources just for the purpose of getting rich, then humanity has to suffer from the natural disasters, earthquakes, tsunamis, floods, draughts, epidemics, etc., from our own doings. So it is not only the religious people who gave warnings about the End Time, but scientists who use their current technology to measure the climate and earth geography, they seem to know even more than others about the threat that may suddenly happen to this planet, which is the cradle of the human species, who are God's children.

“Thinking” of the Deities is the thinking of good. To the Deities there is constant movement without rest, in which some people had translated this concept as Creation-Preservation-Destruction. In simpler way, God is the Creator of all life forms. God preserves the Wisdom and Enlightenment to promote the evolution of everything in this world and the universe. God destroys the old to create the new in the living cycle of the universe, in which the planet earth has the intelligent humans as a part of the structure and center of the cosmic intelligence. This is also a new theoretical lesson that can be noteworthy for you to think about. I repeat again: To the Deities there is no concept of Creation-Preservation-Destruction. Since God is the omnipotent light of good, and only the humans need this concept to determine their actions with reference to the natural and cosmic order. Being too smart may kill you, being too stupid may kill you, but knowledge may save your life. I say a little but it is up to you to understand.

This year 2007, I call it the year of Enlightenment. This is the chance that you can really learn fast and I plan to organize the Level 20 around the month of July so you will have the opportunity to learn with me. From the Level 18 and higher, as I teach I also learn together with all of you in the class.

As you come to learn, there are many souls of your ancestors or High Beings who follow and learn together with you but you are not aware of their presences. For this, you have a lot of merits. So, when you see people at the ages of 80 or 90 who come to learn the higher Levels, do not think they only learn for their health. These elders may be the messengers who lead the way for many souls that can be equal to the High Beings to come to Australia to learn with me.

To go to learn also means to receive new missions, new lessons and new energy of love to protect yourself, your family and your community before the critical time of our beloved planet that God had created billions of years ago. The humans on this planet are God's experimental models of the complex life in a three-dimensional world.

MK: Dear Master, what year will be the year of Mankind?

Master: You want the year of Mankind in order to have actions? Do you wish to die? I just want to stop in the year of Enlightenment. If you have Wisdom/Enlightenment, with many new Luong Minh Dangs appearing in life then the Deities will complete the trial on earth. But if you are still stubborn then you will suffer. You want the year of Mankind then you will have the year of Mankind, which is the arrival of that unexpected moment.

I remind you again so you remember that “Life helps me to discover the Godlike path, so I can assist people during perilous time.” You should thank all the beings who brought difficult trials to you and to our UE School, because they are elevated beings who voluntarily vowed to return to earth to do bad deeds so we can learn from these lessons. After we complete these lessons, we can continue on to the newer one, which is to apply the lesson of Love 101.

Just think about it, from your personal circumstance you may learn from a bad experience. Then you realize that the people who created these bad lessons may not be bad, but instead, they may become good. People who can help you to learn are higher than you. You listen carefully and understand well the newest lesson of 2007.

To say 2007 is the year of Enlightenment, but at least it will take 3 years to complete. This is my anticipation and each night I ask God to be softer toward Mankind. But suddenly on the last night of the year, I was in deep meditation that I could not find God anywhere and I remained alone by myself.

To have new Mankind, with the post-human development era to follow the God’s Grand Design, we need to try to learn and evolve. It is pointless to follow the old spiritual paths from the past. But if you still wish to have the year of Mankind, you can continue to be stubborn. The future is a consequence of today’s action. Since all the lessons from the past had been irrelevant, so they are no longer useful or efficient. I came from a distance very far away, with all of you to come here to earth to help Mankind through this final and most critical time. With knowledge you can survive, otherwise you will learn the same lessons as the dinosaurs in the past that were made extinct.

MK: Dear beloved Master, today people increasingly dig for oil deep down on the ocean floor to have more energy source and improve the economy. They also build many large dams upstream to make hydroplants for electricity. Petroleum and carbon monoxide have damaged the earth ozone layer. In the meantime these large dams cause a tremendous weight imbalance on earth and it may be a threat of major earthquake due to the underground movements. Can you give us a solution to decrease the potential threat of broken dams due to earthquake?

Master: This question is related to scientific issue. In fact, it deserves your attention, especially for countries with many large hydroplants such as China or Vietnam. During

the design phase, scientists already calculate the potential threat of earthquake that may occur underground so you should not worry.

What you should worry about most is the fact that scientists could not calculate the increasing magnitude of these earthquakes. The earthquakes and storms from the Pacific that came to the Phillipines and Vietnam in 2006 were the examples. The geologists in Vietnam had informed me one of many epicenters of earthquakes was in the regions of Son La and Hoa Binh, where there are many big dams. Even though the magnitudes of earthquakes in the past were insignificant, but they carefully monitor for the sudden change from 2007 onward. Since you know, now you try to do something about it!

For business they have to accept to venture, “if succeed they have everything, otherwise they have nothing”. For bigger national issues, you should leave them to the leaders. If you are afraid then you tell each other to transfer energy regularly to the dams in your country. With more UE students in your country who show the same concern then you should not worry.

MK: Recently in the highest UE Level you let us apply the technique of merging our soul with the sick people to help them deal with mental problem, which is the root of their physical ailment. The results were so great, thank you Master. But we have one question: as we do this, are we interfering with these people’s freedom of choice?

Master: On this question I want to elaborate further with newer lessons for you to learn. In my village, the fishermen often go far away off shore to catch fish at night. Especially during the clear night with the shining moon they catch a lot of fishes and shrimps. One night an UE student points to the lighthouse and tell these people there is a big storm coming and they should throw down all the caught fishes and immediately run ashore by following the direction of the lighthouse.

On a calm day with a large catch of fishes and shrimp, and you tell them to follow the direction of the lighthouse to run ashore, how can they believe you? In the same manner you have been trying to encourage your family members to learn UE, because you love them and you wish to help them. You should understand their hesitation.

I put it in a broader sense so you can understand and get the main question and the newest lesson here. If someone still insists to go to the land filled with mines (my village in Vietnam has many land mines that were left behind by the American troops), a UE student told him not to go there because it may be dangerous to his life. He would not believe it and continues to go. What would you do in this case? Do you respect his “freedom of choice” or do you try to stop him even if he rebukes you? So, you chose and try to understand! You merge in order to help and save these people to avoid the cases of sickness or temptation. You try to talk about the freedom-of-choice issue here. You are so ignorant. I also elaborate further that you should learn the freedom of helping people, and this is the meaning of freedom that you should learn.

On this question I also love a number of you who had the techniques from UE Level 5 and higher with the ability to transfer energy from a distance, but you can only do it in secret to help others without much success including to help yourself because you lost your own freedom. If you are used to the lifestyle of getting or waiting for other to help you, then you have lost your freedom.

Now I teach you. I give you the UE tools so you can save yourself, so you can really have freedom. You can be in control of yourself. You can really help others. But then, you are still hesitant. You do not even believe in the abilities hidden within yourself after you have learned Universal Energy.

You do it then you would know. But here you try to prove your own ability by boasting too much about the UE results that you have achieved in order to receive praises from your classmates. There are many cases like this. I love these people because they are losing their own divine freedom to help others.

There is a Vietnamese saying, “when you do good, you have trouble”. This means that it is difficult to help people. When you can truly help them, they do not believe you. But when you just pretend to help, they believe you. These are the “cook books” of life and they contain many profound lessons. I hope you can overcome the habits of waiting for others to help you, so you can truly become a new person who can freely help people with your diligence, silence and humility. You can really have freedom.

MK: Dear Master, the truth is always changing. Through changes we can discover new things in life in order to learn and evolve to have Wisdom/Enlightenment. It is also the overall change in order to have new lesson that you often referred to as the 101st lesson.

In the past, we saw many yogi masters who were highly capable but they only learn the 100th lesson. They thought they were enlightened so they rushed down the mountain to follow the path. Until now the level of human evolution is still not satisfactory. They left behind large volume of books that may be good for reading with beautiful descriptions and words. But it is very difficult to apply these ideas in real life.

Now the Deities helped to open UE School under your guidance, so we can have the key of Divine Love to open the advanced culture of post-human era. Can you tell us what is the most difficult change that humanity will face, so this knowledge can help people to progress to develop the latent abilities to lead a life of happiness, peace and luck during this turbulent time with so many misfortunes that can occur if our life.

Master: The most difficult thing for anyone as a human is to change our own habit. But for people who are used to their habits, their life can be much easier since they do not have many changes in their life and the body spent less mental energy. In short, the lifestyle that follows habit involves tranquility more than actions. These yogi masters through all the ages always seek a tranquil lifestyle in remote mountain or jungle (the tranquil path in the three-dimensional world). Now I teach you to progress in the

turbulent environment, as you are in the current social crisis but you can still succeed. This is something that never exists in history from the past until now. We can find the peaceful and spiritual atmospheres right in the midst of an active lifestyle, in order to connect with God’s spiritual field to learn and evolve. We do not find the spiritual path in remote or secluded place and hide away from human interactions. This way is a path to help only oneself and it may be reasonable. But it would be very difficult to achieve and succeed.

The UE way is a path for other people, in order to truly transform the human body into God’s evolution device for all living creatures, so we can lead them to evolve. This is a new lesson so you can grasp the depth of the other dimensions in space, where we are linked to in Universal Energy. Anybody can follow this spiritual path because the UE model is to lead both “physical and spiritual lives in parallel”.

In the three-dimensional world, when you are calm your ability to preserve energy is better and safer than when you are disturbed. This is a common thinking in most people. It is also right from a logical standpoint. With the human view, earth may be big. But comparing with the infinite universe, earth is just like a grain of sand in the vast ocean. If we view the turbulence on earth with the cosmic mind, then it becomes an unmoving tiny object.

The cosmic characteristic of energy preservation is hidden in the human tendency to choose tranquility. That’s why people like to be at peace. They like to feel secured rather than being active, adventurous to find new things in life. However, as they live too long in tranquility, they feel bored and they want to find actions in order to live and to feel motivated. To achieve this goal they have to stand up and act. In the normal thinking you need an action to have a reaction and to have new things to perceive.

But now you want to have everything. You want less social interactions just to have your own security and you also want to have all the new things in life. But you do not want to act and find them yourself. From that you develop the tendency to wait for others to present new things to you rather than to find them yourself. This is a habit that is the most difficult to get rid of among all the bad habits.

Lesson 101 is to learn to apply, to take charge, and to utilize Universal Energy in human life. This is the lesson of really using God’s love to help the human suffering and problem. This is the lesson of cleaning the physical and spiritual environments to decrease the natural earthquakes or storms, and more importantly, to calm the earthquakes or storms from inside people’s mind.

We try to change habit by seeing people who say a lot but do very little and gradually they switch to saying less but do more. But we have succeeded and people have to “vocally and mentally respect” us for all the UE achievements we had done to promote happiness (Vietnamese saying in farming villages). But most significantly is the change from the habit of waiting for other to help you to the habit of trying to help yourself and others. In fact, this is the characteristic of the new people who can use Universal Energy in every aspects of the daily life.

The change is in the habit of always receiving without giving to the habit of always giving (transferring Universal Energy) without receiving the benefits from these UE activities.

There is a change in the possessive habit as you can get rid of the material ties with your belongings, or in another word you are the slave of these possessions (the materials own the people). From this perspective you can have a new thinking that people can still use all these material belongings, but now they are use for the purpose of life and we are absolutely not depended on them. People can have freedom.

There is a change in the spiritual habit with reference to all the rituals or dogmas, in which people often have to beseech, kneel down and present offerings to the Deities or God, to the habit of demonstrating the action of love, as God's messengers to bring the gift of love, the gift of new energy, Universal Energy to all humans and living creature.

I remind you again: with anything that you still value, that you still see as the most precious, most important and cannot be replaced, then in fact, these are the things that possess you and you will lose the divine freedom that God has given.

The real freedom is the freedom to help people unconditionally. Any culture, ideology or religion that can teach you to help people unconditionally without the discrimination of classes, you should learn these true ideas. You should pay attention and learn from people's good deeds in helping others, then you can unveil the darkness from the beautiful words that cover the true characteristics of freedom.

The lesson I have taught you is: you are active but calm and you are calm but active. You need to carefully remember this point. It also has the same meaning as 'achieve without doing and doing nothing but achieve'. The energy transfer with Chakra 6 is the instrument you can use to express your silent freedom.

The magnificent results from UE healing had spread all over the world. People knew this is the active factor. I advise that you should be humble and regain the nature of tranquility in order to have balance. You allow the factors of calmness and chaos to interact with each other. The concept of "appearance and nonexistence" can manifest itself in the UE lifestyle. From the past until now there are not many people who can successfully apply this Buddhist truth. Now we can do it from a simple UE act, as you transfer energy to save others, to help liberating the wandering souls in order to cleanse the spiritual environment on earth.

Also, I inform you that there are witchcraft doctors in many countries, including Vietnam's neighbors, who try to cleanse the spiritual environment in their country by capturing these wandering souls (they can only capture but do not have the ability to help liberating these souls) and the higher souls for their own purpose. Just like the nuclear waste that people bring to other countries under the disguise of recycling process.

So if you happen to travel to any location where you can detect the presence of this negative energy then you try to help liberating these souls. You will receive the merits and the spiritual environment will be clean so there will be less incidents of car accidents or epidemics. I do not say much but you can understand more. So try to do it.

With this new thinking you see it as the opportunity for you to work and you should not blame anyone or humanity. They do not have the ability to help liberating these wandering souls, but you have so you just do it. That's all.

You need to look carefully as you transfer energy to heal people and you are in a condition of: seeing but not seeing, they have an ailment but it may not be real. In these cases you can feel certain that your energy transfer will work. As you do anything, if this feeling occurs then you can feel confident and do not even wonder how the result will be. For sure, the result will happen beyond your imagination.

Similarly, if you wish to write a book, if you write while you are in an “appearance and nonexistence” feeling, if you write as you are in meditation, then you will have the guidance from the higher energy frequencies. You will write without thinking. You write without preparing the table of contents. The people can read any part from your writing and sense the soul of the texts or scientific document without having to read chronologically from the beginning to the end.

It is very difficult to change habits. But you have changed your soul, so you can change any habit. The spiritual change is the process of filtering the negative frequencies of brainwave, in order to receive the new positive frequencies from the universe to help the ultra-cells that were blocked. Now we can unblock them in order to release the latent human abilities. If we can awaken the changing genes then we will be able to change our personal habits.

Spiritual change is the root in order to help humans to reach enlightenment and activate the God Gene, which is the root of latent creative abilities in the brain. It is the foundation of evolution, Wisdom, Enlightenment and eternal life.

MK: Dear Master, at the present time there is one concept that many people use to explain the spiritual phenomenon and it is “Whatever happens in the physical world, it is the same in the spiritual world”. Can you share with us your opinion on this concept so we can learn?

Master: On this question I will share my viewpoint so you can think about it. From one spiritual phenomenon, there are many different ways that people can perceive depending on each individual sensitivity or level. It is the multi-dimensional characteristic of spirituality that I often refer to as the Combined Frequencies. For example, if you sense 10 parts of a spiritual phenomenon perhaps you can best describe it verbally only 1 part. So, with the spiritual phenomenon only those who personally experienced them can have the potential to give the closest description or explanation. They can only provide a partial view. In Vietnam there is a saying, “Eat snails, talk guesses” to mean that if you do not see the evidence and try to make claims or statements, you will make mistakes.

The easiest way to have the spiritual sensitivity is by using the tools from your daily life to describe your spiritual perception. Using the thought of “physical and spiritual similarities” to persuade people to pay attention to these phenomena can be

the root that brought out many types of superstitious activities. There are many deceiving fortunetellers or psychics, who do not know anything about the divine teachings, but they call themselves as master or teacher. Anyone who advises people to burn paper cars and houses to provide for the dead, is in fact ignorant.

In human history we never have anybody who returns from the spiritual world, in order to give any description about it. So, you need to be careful in receiving this type of thinking. UE Teaching does not tell you to seek these spiritual phenomena to research or explain. It only teaches you the work of a messenger who brings Universal Energy, the energy of love, the light of God's Aura, to help the sick people, to improve the yields in agriculture or farming, and to decrease the damages from natural disasters. You should never fall into the trap of trying the look for ways to explain these spiritual phenomena. If somebody does it then it is his own ability.

MK: Dear Master, can you teach us the newest meanings of meditation and traveling to space?

Master: The spiritual world is invisible, where there is no sound and no color. When people who are destined to connect to the spiritual world (in meditation or traveling to space) then during this moment all the physical laws are temporarily meaningless and all the brainwave energy are changed, because of the energy field from the Deities has the control to initiate the change. With this change you can evolve, as you receive the newer energy frequency, so the Deities can come into your heart and teach you. This is a simple way of describing it so you can easily understand. But the Deities already asked me to help, since they had taught you for thousands of years already. It seems that the more They teach, the more you go backward. It is difficult to use the old lesson during this modern time.

Both - meditation or travel to space have the same meaning. But they are different in the level so you should not misunderstand and suffer the consequence as you attempt to violate. My point is if you want to apply the technique of traveling to space, you need to be at least in Level 16 or higher, because you had my energy transfer to give you new energy and introduce the newer Deities to come and help you. Only in this manner you can apply.

When you meditate or travel to space, there are special waves of messages that come to the ultra-cells in your brain to help your physical body so you can immerse in the invisible spiritual field of God.

At that time the biorhythm of your body works together with the energy frequencies from space. The newer senses that are hidden in your brain will be awakened to connect with the invisible spiritual dimension that you interact with. From that point on, all the feeling of freedom, grace, serenity and peace will come inside of you. At that time all the "junk" messages in your daily life such as message of hatred, discrimination, selfishness, etc., can change into energy waves that are closer to the cosmic frequency, which is the frequency of perfection, love and compassion. The love

of humans and all living creature can be activated from your heart during this moment of change. This is the process of changes and characteristic of evolution.

Unconscious learning can happen during meditation or space travel, because the human brain is like a bag that contains all the “junk” energy waves as mentioned above. It fills up the space with these types of messages, so there is no more room for the new messages. Through your practice and process of filtering these “junk” messages, the bag may have more room to receive newer messages in life.

The new thing in life is not complicated, but instead it is very simple and it is the true love between humans. It is contained in each human action with the focus on helping people to evolve and it is very noble.

Unconscious learning is the new spiritual lesson. In fact, your mind will have new nature that can be similar to the natural mind. So it contains a natural and powerful strength that people often refer to as the power of love. In my village, during the war there were rustic mothers who dared to make a stance to stop the invading troops in order to protect their homes.

When the thought of love in you is completed, at that point you achieve the number zero (0). All the UE formulas I taught you can develop the power of love in order to help your people to overcome the difficult trials of sickness or natural disasters.

UE meditation is done at the beginning UE levels so you are familiar with the invisible world. As you continue on to higher levels, did I advise you to practice meditation anymore? But if you need to meditate, there is no problem. Do you know why? UE Teaching is an application and it is totally different from other meditation schools. Other people meditate because the primary objective is their personal self. But in UE we do not just meditate for ourselves. We meditate by transferring energy to help other humans and all living creature to evolve. For this reason the Deities continue to give me the key and I give it directly to you through the newest and most effective techniques to help yourself, your life and all living creature.

Supposedly the short sessions of UE courses nowadays time can stop at the Level 13 and it should be sufficient. But I see that you wish to research further on UE and you are hesitant to practice or apply. That’s why I continue to have complementary courses until now we have up to Level 19 and it is not even completed yet. I remind that you may recall during the Level 13 I advised you to transfer energy everyday to all the regions in order to send the seed of love, the Bodhi seed to all living creature so all the everlasting frequencies and souls can follow your energy to be liberated and evolve according to God’s path. This is a way to decrease the problems of social disorder.

But how many people can do this constantly? You do it for a few days and you feel bored. I have to organize the recent supplementary courses so if you wish to travel to space you have to do more energy transfers to many regions. Since you wish to travel to space, you will practice more diligently. So you can see how much the world has changed. People were afraid of the outbreak of major wars that could cause high casualty, but the situation was not that bad. Earthquakes, tsunamis and storms also

have been reduced greatly in intensity and frequency as they reached inland! Otherwise everybody may have died.

MK: Dear Master, can you speak more about the most effective technique of energy transfer so we can try to follow it?

Master: You still like to know about the results. You are greedy if you keep on wanting to find results! You just do all these UE techniques and you will gain the experience. As you do it you will have your own lesson and your own creation. But if you learn from my experience and try to follow it, then you are caught in dogma again. Alright, I will share a few things for you. Energy transfer is a scientific terminology so it is easier for you to understand and do it. In fact it is a transfer of natural thought, a transfer of energy of love, a transfer of Universal Energy, a transfer of God's Aura, a transfer of the Bodhi seed, the God Gene into somebody who is sick, suffering and troubled.

Energy transfer can be understood as a telepathic connection between humans and other creatures. It is alright to express as a way we integrate with all living creatures. It is alright to view it as a way to control or correct the errors in the path of evolution of all creatures so they can follow the natural direction. The nature of energy transfer is the nature of "All forms are one" according to the Oriental Philosophy that Master Luong Minh Dang has taught. You and others, you and all living creature are together in the rhythm of cosmic change. You are the active factor in this process.

If you want to have effective energy transfer, you need to find out the meaning of each energy transfer. Today you remember you parents, you transfer energy to them, establish telepathic connection with them, so they can be healthy and live longer in order to show your gratitude toward their efforts in raising you. The meaning may be different and the result can be beyond your imagination. Your parents may not know that you transfer energy to them, but their souls know. They rely on this energy to be healthy and to learn in order to evolve in many aspects.

The next day you transfer energy to people who hate you and you wish to send the gift of love, Universal Energy to them so the High Beings who volunteer to come to this earth to teach you the bad lesson so you can progress until today. The meaning of energy transfer can be different. You do not just feel better, but in a few days these bad people may change to love you and they are no longer bad because they complete the mission given by the Deities.

Upon seeing earthquake, storm, tsunami, war, epidemic, you say to yourself: that you transfer energy to these poor victims and living creatures that are caught in these disasters. You pray to the Deities to save the souls of these unfortunate people. This is the meaning of the energy transfer to raise the level to be equal to the "Savior".

This is enough to satisfy your wish to learn the new lessons during the New Year 2007. Next time I will share more. Remember that UE teaches you to act, and

through your actions you have more creations. I am happy as I see that you are more mature. I send you my greetings and I really miss all of you!

MK: We sincerely thank you for your precious teachings during the New Year 2007. We promise to be your worthy students.

Remember the Mother of Humanity

*Spring has returned to the Great River
Remember the bird's heavy flight
Remember the grass and flower
With the morning dew still has the moonlight*

*Remember Her suntanned beauty
After taking care of the morning, then came the evening
One bowl of rice in a rustic life
Patiently waiting for Her children everyday*

*Hearing the birds from the mountain peak
Remember the mother who is weakened because of the children
Hearing the children's cries in the village
Remember the Mother we see the bright new world.*

Mekong wishes to send this poem to our dear Mother, the Mother of Humanity, who comes to the Altar of Mankind's Ancestor. She has sacrificed for all Her children through all the ages!

CHAPTER II

NEW SPIRITUALITY – THE TRUTH ABOUT HUMAN LIFE

UE Student: Dear Master! Truth-Goodness-Beauty is the truth that has been taught by Buddhism. But this truth is only an abstract concept. We have read many books that people mentioned about this subject, but they were still ambiguous and nobody can understand its true meaning. Please guide us so we can have a better understanding.

Master: This is an interesting question that relates to the Buddhist concept of Truth-Goodness-Beauty that most people already know. To put in an easier way to understand this truth is: if you know how to live with sincerity and act with kindness, then you will feel the supernatural beauty and colorful life that the Deities have given to humans and all living creature.

The beauty of life is just like music, in which any missing note can make the whole symphony lose its natural flow. That is the characteristic of life in every creature. Perhaps this answer is enough for your question.

On this question, I will expand further for you about a new concept of the truth so together you and I can learn and research with the intention of using the old lesson as a way to receive and study new lessons. But we are not researching this Buddhist lesson that has been around for thousands of years already.

Talking about Truth-Goodness-Beauty may sound so good and anybody can understand it from a theoretical viewpoint. But to put into practice is very difficult. Because everybody knows that living with sincerity means to lead a true life, which is to live in the truth. But the problem is people are often afraid of the truth. This is a very illogical. People like to live in deception because it is very easy to do, and importantly everybody is alike. In society, regardless of how advanced it is we cannot see the deception. Furthermore, the deception of today can be cleverly expressed as though it is the truth. That's why people feel more comfortable and safer than living with the truth. Isn't that right?

The lesson that I try to share to you from this question is the true lesson in each of our own life. You listen carefully in order to receive the newest lesson that I reveal so you can learn.

You, above all people, know about the true life that Universal Energy has given to you through the changes of your skin and stable health. However, you are reluctant to completely change your attitude because these deceptions are still quite interesting to you. Without a distinct attitude change you cannot apply Universal Energy appropriately with the natural latent abilities and Divine powers that are hidden within you so that you can be a “savior”.

Why do people try to hide from the truth about the sensitive issues of their own lives? People are afraid of the truth because only the truth contains new information, and revealing this new information will be a challenge to anybody who encounters it. Fearing the truth means fearing challenges, and it is that simple.

I wish to remind UE students of one fact, which is when you do not distinctly change your attitude and stop at the point of only recognizing the effects of Universal Energy, then the result of your Universal Energy application will be very limited. Even though a number of you have tried to learn to higher UE Levels with the wish to have stable health and good fortune in life, you have limits in applying Universal Energy within your daily life and this is quite normal. Being a UE student, you are still afraid of the truth about the effects of Universal Energy on human life, so you should not criticize other people in society.

This truth can only be realized by the acts of kindness, otherwise it cannot. Regarding the word “spirituality” (*tâm linh* in Vietnamese), now I show you its meaning simply as: the intuitive recognition of the truth from deep within the human heart. In most of the Eastern/Western or Ancient/Modern books that you read people usually link the concept of spirituality with mysterious phenomena that can be difficult to understand. They rarely describe the real characteristic and truth about this concept. But that is the business of publishing books! After they write for a while, the subjects start to be complicated, even to the point of being unclear and there are people who believe in it. This is also the darkness in mankind, which is superstition.

The Deities created all living creatures next to humans with their simplicity and goodness. Humans with their complicated brain cannot fully grasp the remarkable beauty within all living creature as a whole. In the research study of Master Luong Minh Dang’s Oriental Philosophy every concept, creature and event are always simple and easy such as the air, water and rice that you use daily.

Universal Energy is spiritual energy and this is a fact. But it can only be acknowledged and cannot be researched. Because of this trouble point, that humans have lost the chance to receive the energy from the Deities. Especially at the present time when something new comes along, it has to be clinically proven. Regardless of how useful it is, without proof it will be dismissed.

In my poor village there is a chant that goes like this, “chicken has two legs, pig has four legs, to know why you can bring a ladder to go up and ask God.” The tendency of people today is to find a way to prove the fact. Therefore we are “going around in circles”, which can cost money and human effort because the fact is the truth and it cannot be analyzed or argued.

I want to tell you something funny: any of you who learned up to the Oriental Philosophy I Seminar would become millionaires already with the technique of “space travel”. Why? As you can see now there are billionaires who spent 20 million dollars to have the sensation of zero gravity in a space shuttle for one week. But you can travel to space at any time without the expense and you have much better sensation than them. You are also healthy and more importantly you are activating the latent abilities

in your body. These people who return back from outer space, they seem to be alright, but they may have something wrong with their health. Do not think that because you have a lot of money you can recover your health.

New things often happen in your life and this is a fact. Its source comes from the changes in the lives of all creatures and changes in the infinite universe that the Deities created. The appearance of new things will eliminate old things, and even the old things that people use as standards for themselves, their community and country.

In fact, the appearance of the new will be similar to the purification of the old, or more clearly meaning that the old has been regenerated and transformed into the new. From a characteristic viewpoint, it is still the same thing but its essence may change, which is the diversity of material “existence” which can manifest itself as the body of the Deities in a three-dimensional world. The invisible “non-existence” is absolutely “uniform” and can only receive the truth. You realize the truth through truthful acts and UE activities. This is the foundation of the theory of the truth. You should listen carefully so you are not blocked by books in society that cover the true self that lies deep within your heart.

I repeat again so you listen clearly. UE activities are the most effective ways to learn and obtain the truth. You should never fall into the trap of human reasoning. Their saying may sound right, with good feeling and beautiful words, but they are not able to do it. In the religious community today, people have the tendency to pray and ask for favors from the Deities rather than to do something to help themselves and others. This is not a weakness in religion. But it is not the time yet to fully receive the spiritual power from the Natural Omnipotence. Fortunately, there is an increase in the number of people from different religions who learn Universal Energy. In fact, you are the valuable treasure of your own religion, since through me you are the pioneers who fully receive the spiritual energy from the Deities that you worship. These Deities asked me to do it, so I am responsible for guiding you so you can succeed. If you succeed, you should thank your Religious Founder, and you do not have to thank me!

UE Student: Dear Master, when we think of death we feel discouraged. This is a biggest obstacle on the path of evolution to learn about wisdom and enlightenment. Please teach us the meaning of death so we can learn.

Master: The death of all creatures is a fact that changes and if you understand the meaning of death then you do not die anymore, so you do not fear it. In my Vietnamese village there is a business of growing silkworms to produce silk, so I tell you about the transformation of the silkworm. The butterfly lays eggs that turn into silkworms. The silkworm eats the mulberry leaves and eventually grows to become a chrysalis. It makes the cocoon and stays inside until it transforms into a butterfly. It is safer to stay inside the cocoon because the cocoon can protect it from being eaten by other animals. One day a farmer saw the glossy and velvety cocoon so he took the cocoon to make silk cord. That was the end of the chrysalis’ life. However, there are

good cocoons that people would keep to reproduce so the chrysalis can turn into butterfly and lays more eggs for next year.

This interesting lesson can be summarized as: the butterfly, butterfly's egg, silkworm and chrysalis are different in their forms. But in fact they are only sections of a path of transformation that can be constant, and the scientific people can call it the life cycle. I often mentioned many times to you during the lecture that you have gone through spiritual training in many lifetimes already, you have learned all the lessons, so now I only give you a reminder and you can recall them. Isn't that right?

There is one critical point you should think about from this lesson. Do not think that by staying inside the cocoon you are secure, because in the law of nature there is no concept of security. As soon as somebody has a concept, immediately the opposite concept will appear. For example, when there is a notion of safety then the notion of danger follows. Similarly, in philosophical life, when you have the concept of wisdom and enlightenment, then you will immediately have the opposite, which is foolishness and darkness. Isn't that right? But we still have to use this concept as the tool to express in our own learning. There is nothing else. You should never think that I have the same opinion as these scholars when you see I share a viewpoint that relates to one of their theories or another of their opinions. You are all wrong. I use the story of the "silkworm that makes the cocoon to produce silk cord" to tell you the truth about the physical death so it is easier for you to learn. Do not think that I am talking to you about science. Whoever can understand my method of teaching then he or she can learn the new lessons very fast.

That is why I often tell you that everything and every concept that lies within the wealth of human language is still people's viewpoint. They are the products of the human brain. The Deities do not have these viewpoints as humans do.

The fact of all life as God created is to be in harmony and unity. But people always want to separate them, to make it more complicated and to cause more chaos in all living creature with human thinking - even though their existence is in order. You have to think carefully about this new concept to apply in UE life to bring peace, luck and happiness to yourself.

This discriminating mentality of man is the cause of indifference in thinking, unity, and the root of struggle for existence. It has caused many tragic problems in human lives on earth. Humans are different than the lower animals in the way of sincerely helping each other in the Creator's infinite love to guide others to evolve according to the everlasting changes in the universe.

I mean to say that you should purify and detach yourselves to return to the "zero state" in order to have everything. You should get rid of old habits if you see that they are no longer useful. You should get rid of the old concept of spirituality then you can learn the new spiritual lesson. You still go to the temple or church, but you come there as God's connection to transfer energy to these people to promote their health and it a meaningful way of worship.

To detach and return to the peaceful state means to have everything and never die. So you can choose: death or purifying the body to have eternal life. Living with an idea of having everything then how can you avoid death? Only today or tomorrow, not far away, mankind will face many unwanted deaths, but they still happen. On 07 April 2007 the scientists officially announced on the news media that 1/3 of living creatures on earth will be annihilated because of the changing earth's climate. Additionally, there will be 10 big rivers in the world that may dry up, including the river Mekong in my country. This is the scientist's warning. I have given you many warnings about the earth and human problems in the "New Year Messages" during the recent years in the 20th century. It is not now that I start to tell you based on these scientist's warnings. It is such a pity if you have the UE formula in your hand and you are still afraid of death.

If you are hanging on to physical life then death is waiting for you. To research and learn about spirituality is to learn the truth about your soul and your life, which are the foundation to help you evolve. Simply stated, the soul is like the air and it came from nature and the Deities so it is everlasting.

The Deities have given the UE buoy to the world to save physical bodies during this period of reform, in order to maintain the human race for the new civilization. People can be saved by UE due to each individual destiny. For you, as UE students, I can save only 95 percent of you! You have the UE "buoy" so you should not wait for anyone to save you, and you should use it to save yourself. This is the most effective way.

Returning back to the story of silkworm farming in my country, the point I want to emphasize here is the role of the farmer who takes care of the silkworm as mentioned above. He is the person who controls the change and growth of these living creatures in the business of farming silkworm to produce silk. The results of these transformations can be seen through the beautiful silk dresses that are worn by God's children.

The silkworm sacrifices itself to produce a beautiful silk dress for people and it feels very happy as it can serve God's children. The death of a silkworm brings forth a meaning for human life.

Besides the silk cord, farmers can use the remaining chrysalis as food. To put it in simpler way, directly through the evolution system of man, silkworms can be the fuel to produce living cells as well as energy for human beings to live. The silkworm can transform into the organs in the human body and perhaps this is the fastest way of evolution of all living creatures. The silkworm does not die and still evolves. This is a key element in the discussion of UE philosophy. There were times you jokingly said that eating is also a mission, and it also refers to this philosophy.

I remind so you can remember: humans are God's great evolution system in order to help all living creatures according to the model that God has designed. The models that can combine all the natural essences are humans and God's children. In fact, regardless of how far science has advanced, it cannot create a perfect and fine

system that combines all of God’s fundamental nature just like a human being. This is a fact that can be proven and it is absolute. That is the truth about human life.

The making of a perfect product such as the human system is a collection of all the information from billions of years of God’s creation. So, we will not have the end of the world. However, to purify oneself to have eternal life is the mission of each person, if you wish to follow God’s path of creation. The physical death is like something that falls down in order to transform and combine all the elements to revive. That is the meaning of death. Does the leaf die? In fact, it is regenerating its new life. Without the falling yellow leaves during autumn, how can we have the infinite green color of spring?

Why does mankind fear death? Because regardless of how high you reach on your spiritual path you still stop at the theory of the 100th lesson. The Deities allow us to learn the 101st lesson, which is the study of UE spiritual science application in life and the end of the meaning of death.

It is a fact that people always fear death, because it is a changing fact. But if we know how to change, how to apply UE spirituality to change the body then there is no more death to fear. People who fear death really need to learn this.

UE Student: We wish to ask you, Master, humans and animals rely on each other to live in harmony with nature, and so do humans need to sacrifice for other living creatures to evolve?

Master: In fact God does not force His children, the humans to “sacrifice” to feed any animals in the natural food chain. This is a blessing that God gives to humans. Because of this love and special attention for God’s children, that’s why humans forget who we are, as well as who brings to us all of the special favors.

In fact God gave humans a lot of abilities in the field of science so humans have a sufficient level to use all the resources on earth to live with all the material means for many recent centuries after the first industrial revolution that occurred in England.

A famous Swedish scientist, Alfred Nobel, who is well known today as the Nobel Prize founder, invented explosives with the purpose of helping miners to improve their hard work in excavation. But people abused this knowledge with the purpose of making gunpowder to conquer and kill each other. If there is a need of sacrifice then humans need to “sacrifice” their ownership of these scientific inventions to share to others so that the progress of science will be stronger, even if we do not want it to be. If we can do it then humans do not need to sacrifice anything.

Scientists have the souls of the Master from Atlantis who return back to earth during the recent centuries to bring forth the knowledge of new science and create a new civilization of the human race. Unfortunately these scientific inventions are always linked with their copyrights and they can only benefit a certain group in society. These beings did not complete the mission that God has given so they have to wait until they can learn the 101st lesson in order to evolve.

I remind you that after death the ordinary soul has to wait for a chance to reincarnate in order to learn and evolve in this world. This waiting period can be millions of years long. You should not waste the time that you have in this lifetime to learn and evolve. That is the reason why during the recent years there were many continuous UE Seminars. Sometimes there were 3 Levels in one year and whoever receives this message will have a chance to evolve faster.

The person who invented explosives, realized at the moment of death that the ability God gave him had been taken for the purpose of environmental destruction and it was true. From then on, even if people do not want to sacrifice, they will have to sacrifice because of wars and racial discrimination, because of the abuse of God-given scientific knowledge for the purpose of going against the law of nature. The law of nature is the harmony of all living creatures on earth, which is peace, love, wisdom, enlightenment, luck and happiness.

The period of industrial development is based on the resource of petroleum and minerals that scientists usually refer to as fossil energy. This is a way humans show their “desire” for sacrifice. They call it 'fossil' energy, meaning that it is destructive and the Deities allowed it to fossilize and hide it underground so it would not cause harmful effects to other living creatures. If there is a concept of evil spirits, then this evil energy can destroy the environment and human life. The benefit of today's industries is so great, but unfortunately this greatness also activates human greed and leads people toward the illusion of desperation.

I show you that the evil spirits have been hidden deep inside the earth and people discovered them. We set them free in the world so they are able to cause a lot of suffering and insecurity everywhere in any aspect of life.

Many of these sincere scientists have spoken the truth that nowadays, evil toxins have their source from fossil energy, from the concentrated condition that is hidden deep inside the earth to the uncontrollable expansion. Toxic chemicals have found their way into our daily bowl of food as well as our modern means of life like cars and houses. They may look appealing or interesting but in fact they contain many types of toxic substances. These devils do not directly harm humans, but their poisons, particularly poisons in the form of thoughts are the silent killers, and sometimes people seem to appreciate them, too.

The ancient Vietnamese people seemed to recognize this point. I want to share with you another funny story. In the village from South Vietnam there was a man named Nguyen Dinh Chieu. Because of the hatred towards the French for colonizing the country with religion and using industrial products to buy off the villagers, he refused to use these products including soap, since he said that soap came from France. The revolution against the French failed because how could they win the French with the guns and ammunitions by using only spears and arrows?

If you bring the devil into your own home then how can you have peace? UE Teaching does not tell you to stop using things that are the products of science and

technology. But we only remind you that regardless of any product or where it came from, before using it you should transfer energy so it is safer.

God does not want humans to sacrifice. Does any father want his child to die? But there are people who want “to sacrifice” and die. These people who want to die are the ones that go against the law of nature.

UE Student: Dear Master, can you elaborate more clearly on the truth of human life so we can understand and follow according to the law of nature?

Master: I already explained above and now you wish to understand better? To understand the truth about each person’s life, first, you need to know the reason why this person fears the truth. Then, he will be able to understand the truth about his own life. In other words, due to the fear of the truth about your life, you cannot understand it. I will elaborate further on this new lesson so you can think of the truth about your life, otherwise how do I know the truth in each of your own lives to give the answer?

To put it plainly, human life is being controlled by illusion, which is the darkness, and upon seeing the light how can it survive? Relating to daily life, you want to point out the thief so police can arrest him in order to have peace, but you are afraid that he may take revenge. You really want to help a girlfriend but you are afraid that your wife may get jealous. You want to take out the thorn in you foot but you are afraid of the pain and bleeding, etc. Since you see the darkness, the thief, the jealous wife or the bleeding wound as bad, as something that can endanger your own safety, so you are afraid of them and in a way you are afraid of the truth.

In life whatever your fear will often follow you and will not let go, or sometime it even causes more damage. The fear of being sick from transmitted disease would put your immune system in an idled state, in which it is no longer active to fight disease. The fear of losing someone you love causes you to be weak and under her control. Eventually you lose the dignity of a man that should be respected by others. The fear of losing your business causes you to be under the control of people who hold business information, and consequently you lose the dignity of a business owner. *Fear has blocked the development of human latent abilities* and this is the newest lesson.

Experiments on the bipolar structure that includes the opposites of light-darkness, white-black, good-evil, positive-negative, etc. that exist in humans, events, materials in all of God’s living creatures had caused you to be afraid of the “darkness”. When all living creatures change to bring forth new things then you may like them. It is because you fear the darkness that you cannot improve to receive new things. Fearing new things means to fear the truth, or to fear the changes and in fact to fear the truth.

You do not have to look far or to learn from people’s lies. You should learn the lesson of fearing the truth, fearing the truth about yourself, so you can learn and do not be mistaken. If you know how to learn in this way, you can quickly and effectively

clear away the old things in your life. Only in this way you can receive the latest spiritual lesson to become a new person.

The most critical point is do you want to silently learn and purify yourself or not? In the month of July 2007, I will organize the UE Level 20 Seminar to give you the latest spiritual tools and new energy to you have the sufficient ability to purify yourself in order to have the conditions to receive new lessons and the latest UE techniques to overcome all the challenges and continue on the path of spiritual evolution to help other people.

Purification does not mean to get rid of old thinking, or to sacrifice anything. It is to know how to use the latest spiritual energy that never existed from the past until now in order to purify your body, so that your ‘painful’ truth can escape the cover of darkness.

For those of you who do not learn this Seminar, you should feel calm. Anyone who learns from Level 16 and higher, as you practice space travel each day you should transfer energy to all the organs in your own body, the more the better to help the process of purifying the negative energy waves that surround your body, and within each of your own living cells. This is the start of the purification process so the true self and truth inside can be awakened, and the love towards humans and all living creatures can shine inside your good heart.

UE Student: Dear Master, we feel that the ego is something abstract and constantly changing in the process of life and learning. Can you explain for us the meaning and development of the ego?

Master: On this question I will elaborate further so you can understand that the human body is covered by many different energy frequencies, by many spiritual dimensions in space, by various souls such as your ancestors, other animals, plants, including the souls of those that you refer to as your Divine Beings. This type of chaos creates the darkness.

The darkness has covered the true self, love and forgiveness in humans and other living creatures. They are being well hidden. When I was in Vietnam, there was a saying, “when you are sad the surrounding view can not be happy”. This saying is pointing out that fact that the darkness is covering the truth and true self, and makes people suffer.

Once I said, “The soul does not eat food, wear clothing, have a name, have interests, have emotions and it has no sin.” The unfortunate mistake that humans often made in the past and until now about our ego is to manifest it in the form of selfishness, greed, hatred and lust. They bring such terrible consequences as everyone already knows.

The ego is not only the body, but it is also your soul. It does not need anything except to learn and evolve. The soul does not live in only one human lifetime as you often think, but it lives through many lifetimes in different bodies and situations that

can sometimes be straightforward or difficult. Being in a straightforward or difficult situation is not the issue, but it is more important that a soul has the opportunity to learn the lesson to have wisdom and enlightenment from different scenarios in the world to evolve.

Who is learning? Is it the body or the soul? The body is temporal and the soul is eternal. So, the learning in each lifetime has two objectives: the learning of the body is short, as it learns to live and survive; the learning of the soul is eternal and it learns to evolve. You can see a soul just like a student who attends college. He has to learn all the courses in order to graduate and find work in society. Each course is a time you reincarnate into this world to learn. I give a simple explanation like that so you can understand and remember your own destiny in this lifetime. The lesson of the truth about your ego is still very long, and wherever you progress then I can teach you up to that point.

In fact, your ego is a product of borrowing of mental energy from other people or the external environment. When a child is born, he does not have the ego and he is innocent just as a plant or flower. During deep sleep the frequencies of our brain's energy is lowered so the "meeting room" is closed. It does not allow the Beings in your mind to have discussion in your brain, so the ego disappears. But when you wake up the "meeting room" of the Beings who are in charge of your soul is opened and everything continues. Do not blame your brain for being disturbed. If you do, you should blame the Beings of your mind who never stop by saying to them, "I know it already, why do you keep on telling me." This is the cause of your suffering. This is a very simple example that helps you to understand better about your ego.

So does the ego exist? Who can accept when we say the ego does not exist? We can say it does exist and that it is not the inborn product of your body, but the constant conversation between the mental Beings who use your body as a "meeting room" in order to discuss and learn about wisdom and enlightenment. This explanation seems to be more reasonable.

I mention that during the present time there are many Beings who come to this earth to help mankind. I mean to talk about the appearance of this new mental energy that can help us to change mentally and spiritually to have peace during this final trial of human civilization.

Do you blame Heaven and Earth for bringing you to this world and forcing you to suffer? Whenever you suffer, you should ask these mental Beings who are discussing in your head, "Whatever You are discussing, I really do not know!"

It is just a funny saying. You do not see these Beings. You only see the people in community who plan many things and tell you to follow this or follow that. Then, they threaten to withdraw this privilege or that privilege so you are afraid of them. Recognizing this fact is a critical factor in the process of purification.

Your ancestors who had evolved or the high souls, or even the Deities that you believe in and worship are all in this frequency of mental energy or we can temporarily refer to as the frequency of psychological energy. For thousands of years people often

prayed to the Beings with this same energy frequency to help them, so it was very difficult for them to evolve. Whether you completed the evolution model of this Being or that Being still depends on your evaluation. If it is still meaningful to you then you continue on with it and I am waiting to see if anyone who completes it so I can learn further.

UE Student: Dear Master, can you teach us about the concept of the Deities? How can we identify Them? Does the process of purifying our ego to live with the true self mean that we recognize the Deities?

Master: It is a pity that tradition, culture, family, society, religion and science cause you to suffer and fear the truth. The reason of suffering is the spiritual problem that occurs in the psychological energy frequency. The Buddhist and Catholic scriptures were introduced about 500 to 700 years after the beloved religious founders passed away. At that time there was no tape recorder, so the primary way of spreading the messages was by word of mouth. So, the problem of “three copies and seven versions” is very common.

The Deities’ infinite love does not mean that you have to follow Them in order to be saved. Just look at the light rays in nature and you can see this unbiased light shines on all living creatures to promote growth. It shines equally to a person who appreciates it or someone else who does not even care to see it. Wisdom is the philosophy of this light. What about enlightenment? Enlightenment is the recognition of the light and the existence of the Deities’ infinite help to all life on earth as well as in the universe.

People only teach you to worship heroes, geniuses, scientists or founders of religion. The Buddha, Christ or the Prophet does not need you to worship or praise Them in the foolish way of the present time. They only need you to have the wisdom and enlightenment to utilize the tools of the light of wisdom and enlightenment, the light of love and compassion to help people. By learning UE you have more tools to use Universal Energy and the combined lights to serve people in community. But you need to remember that you have to use wisdom and enlightenment then Universal Energy can be more effective when you apply for the critical objectives of helping human life.

Purification is to get rid of the thinking based on dogma, discrimination, or doubt. The thinking process that is influenced by others or punishing those who do not abide. You get rid of these things so the human latent abilities and spiritual energy from the Deities that are hidden deep within your heart can shine.

In UE activity the true self appears, the divine fire of the universe deep within your heart shines, and the veil of darkness has completed its task. At that point, you will realize the truth. The truth about the Deities is that they have no appearance, no color, and no name. It is a supernatural energy. It is omnipotent, perfect and constantly

changing in order to create the infinite universe, in which we find our beloved planet earth.

The Deities allows the establishment of UE Teaching. Each of you should have a self-realization in order to find the truth and to know it. I mean to say that each of you is a truth and God's child. In the advanced Seminar of Oriental Philosophy, I analyzed the concept of "God and Man, Man and God". We should understand that we are God's children and God manifests Himself in each of us. So we are God.

The UE results can differ between each of you. Do not see that someone has succeeded and you feel anxious. You should remember an ancient Vietnamese saying, "To have later is to live first". The meaning of this saying refers to the spiritual life, as you reach a later stage you will have more subtle benefits. We use the example of building a house and I share with you a funny story. As your house is built at a later stage, the materials will be more modern and cheaper and the design will also be better. So, it is better to have a house later and you enjoy it more than other people. This is the meaning of the castle of Love and the spiritual castle for your eternal life.

Regardless of your UE Level, you can purify yourself to find the truth, to know how to have anonymous UE acts in silence, to know how to have a spiritual energy connection with me and you can purify your body to reach wisdom and enlightenment.

I teach you in a very simple way. The truth is your true self. By living with your true self, you will find the path of eternal evolution of your soul. This is the way of spiritual development in every school of meditation or religion from the past until now. The word we use to express this meaning can differ from one era to another. But the essence of the word "truth" in the Buddhist concept of Truth-Goodness-Beauty is the same as the true self. If you want to evolve then you have to purify your ego so the true self can shine and expand. Living with the true self is the same as manifesting the Deities inside us.

UE Student: Dear Master, what is the difference between the true self, the truth and the facts of human life? Can you explain so we have better understanding about this concept?

Master: From many lifetimes people have talked about the true self, the truth and facts. But nobody can fully understand the deep meaning of the word true self. For the majority of mankind the conventional explanation about this word is still abstract and that is why the truth can easily be distorted. People easily forget the truth. It is a pity that we waste the opportunity to learn and evolve. The truth of a simple life is to learn and evolve. There are many people who learn a lot but do not evolve much because what they learn is an illusion. This illusion does not contain the truth and it cannot be linked to the truth. The truth is this fact and you should remember it well!

In UE Teaching, the true self is the truth and fact. The most convincing fact is when you come to learn UE, you begin on the journey to discover your own true self. You are not only finding the true self, but as a UE student you can also apply this true

self in daily life. It is not so abstract or difficult to grasp as described in books that you have read. I remind you the true self is the human latent abilities, which is Universal Energy that is hidden deep within your heart. It is the aura of the Deities that is contained in the God gene inside a special cell in your body. It helps to maintain your physical life in each minute or second, so you can have health, vigor and life energy. Your true self inside can also help other people who are connected to UE by fate as well as other living creature so they can live and develop according to the harmony of all life in this planet as well as the marvelous nature that we refer to as the universe.

Does the true self change? The true self is the truth and the truth often changes. So the true self also changes to follow the path of natural evolution. To have a broader understanding then we see each person as a truth. Why? Because even if people are twins from the same egg, they still have their differences in physical appearance and personality. This is similar to the ancient Vietnamese saying, “Parents give birth to a child and God creates his personality”. Some of you who are scientists have reported to me that the structure of fingerprints and breathing rhythm in each person has its unique code and nobody has the same one.

Also, scientists find more interesting facts in your study to reveal that the fingerprint is not permanent and it can change due to the activity of each person in life. This point means that the truth is always changing and it is active. This is the reason for humans to override their destiny to lead a life of luck and evolution.

Recently, I have many contributions from scientists all over the world and I suddenly realize that they have many common points with the UE spiritual science courses that I have been teaching you. This is the source of personal contributions so I can set the new direction for teaching UE in the future.

To express the truth, Buddha left a luxurious castle to walk all over India and nearby regions in a cassock to find the truth and spread the Buddhist teaching for more than 2500 years. He realized the truth and the fact of his era was that the majority of people, who lived near the luxurious castle in India’s social classes, were poor and sick.

The point that helped Buddha to realize the truth was inside the castle He could not learn anything from all the books that described the truth according to the model of Truth-Goodness-Beauty as shown above. The religious rituals may look great and impressive but they could not help anybody to have happiness, luck, progress and intellect. On the contrary, living in the truth is to live with the poor and hardworking people. He was able to learn many new things and obtained the treasure of Buddhist philosophy as we have nowadays. It started from the years He was a normal citizen and lived together with the poor people. That was the lesson from 2500 years in the past, in which a true Master was searching for the truth. But now the world’s environment is different and the truth of this modern era is also changed.

It is true that the earth is increasingly warmer; the icecaps from both of earth’s poles are melting; and the threat of major floods that affect large regions including islands and shorelines is imminent. Consequently, we will face the disruption of the

typical ecological system and deadly epidemics that we have never encountered. The number of volcanic eruption, earthquake, tsunami, tornado, draught and flood will increase in occurrence and strength.

The physical disruption of the earth will cause many related issues such as the change of earth's magnetic field, and the changes of earth's attracting and repelling forces with reference to other objects from outer space. Thus, the risk factor of collision other asteroids is very high. Humans are stuck with suffering, fear and danger, and adding the characteristics of selfishness and greed can really awaken the gene of violence in people. These types of people can do things that we can never imagine. The consequence is very significant to the world as well as the survival of humanity during this material era in which we can have everything and anything can be destroyed instantly.

I summarize some of the main points about the situation so you can easily understand and remember. But you should not be afraid. When the Deities introduce the UE Teaching with many new UE formulas that contain God's power then everything will be settled peacefully.

UE Student: Dear Master, the true self has been hidden deep within our soul in order to receive the truth. So, what can we do to reveal our true self?

Master: Whatever you do you should ask yourself and if your true self is revealed then you do not need to have this discussion. The truth is always changing. If you can recognize the true self to obtain spiritual learning and evolution, then you can do anything and you can change anything. There was a time I said that you are the assets of your country and community, and this is what I meant. So, on the question about the true self I want to share with you a new concept about "the truth is the fact". This is the next lesson that follows the lesson of "standing above the view of right-wrong" for you to learn and practice. This is the latest lesson in June 2007, with a new viewpoint about the true self, the fact and the truth. You will have greater spiritual advancements in order to contribute and help mankind to have peace during this final trial.

I also want to re-confirm with you a premise that the truth and the fact is always changing depending on the evolution cycle of all living creature as the Deities have designed and arranged. From the past until now, the unfortunate mistake about the human concept of the truth is: the truth is fixed like a constant and it is eternally correct in any era. Therefore, we can never find the truth. Master's Luong Minh Dang's Oriental Philosophy Seminar is a philosophy of expressing God's true love and a philosophy of actions.

When you act in love you can sense the changes in every second and every minute. I re-confirm with you that the Divine truth is always moving and changing. This UE philosophical premise is totally different from all the Ancient and Modern Eastern or Western schools of philosophy. You should remember it well!

The opportunity for spiritual evolution during the time of UE existence is very high. You know that I continuously receive the new UE formulas from the Deities. It brings out the fact that the Deities are reaching out to save their children in this world in order to open a new culture that we can refer to as post-human and the UE culture. The Deities do not have the concept of selection. But in my beloved country of Vietnam, where they still keep the original culture with the Bronze Drum, has met the criteria to be the first country to develop UE culture. The word ‘Nhân Điện’ (Human Energy) can be simply understood as humans (the word ‘Nhân’) who have the Divine Energy (the word ‘Điện’). You can remember this original name of our School as God has given its name. When you have UE inside, it automatically shines out. You should never impose your own will in every action because UE is God’s energy so all the ordinary conditions of the brain, including your will do not have any meaning.

You should ask and give yourself the responsibilities on what to do. When you already learned UE, especially in the higher level such as Oriental Philosophy, you should let your true self shine. I never give you any responsibility. But I am waiting for the appearance of your spiritual evolution and true self. Regardless of your level, I always give you the invisible support so you can progress.

UE Student: Dear Master, we see that humans do like the truth! Because there are more people who buy and read newspapers that reveal the truth. Can you discuss more about this point?

Master: Your perception is correct! But people only like to find the truth or condition about others, and they cleverly hide the truth or condition about their own lives! In Vietnam there is a saying, “You show the good and hide the bad.” It may sound strange and awkward, but it contains a truth to reveal the basic human nature of the present time, which is a serious disease that leads humanity to a world of illusion. Each of you can think of your own life and rate yourself. If there is anybody who is not affected by this disease then I give 10/10 points right away.

Recognizing the truth about yourself does not mean that you are “complaining about yourself”, but you need to know how to silently filter out the truth. It is not important that the truth about yourself is good or bad. But it is important that whether you can evolve or not when you learn UE. If you are already good, then try to improve to be better. If you are bad then you should ‘be converted from wrong to right’. In the warmth of God’s everlasting love there is no concept of good or bad. As you have more UE acts, your true self can shine and your bad side will be gone.

Only the prescription of wisdom and enlightenment can treat the disease of denying the truth about your own life. Otherwise there is no cure. It is very difficult for you to evolve if you do not realize the truth about your life. In other words, the reason for learning UE is not important, and the truth about the life of someone who learns UE is not important. But it is very important that this person wants to find his true self

or not. The true self is UE, the Divine Energy inside each of your soul. It has the structure and power of the infinite and eternal love.

I say it in a funny way! It is strange and interesting that people quickly accept the good as well as the bad, and this is a serious disease in humanity as well as the root of all suffering nowadays.

The truth about my life is an example and I have shared with you clearly and openly in many classes through my 18 years of UE teaching. I am an ordinary and simple person, who eats, sleeps and has a personal life just as all others.

After learning the lesson of “the fact of your life is the truth”, do you still ask about who I am anymore? Or should you believe in me or in your true self inside in order to evolve? You can no longer praise or worship me because I have revealed the truth about my life to you already. If you respect me then you should respect your true self. Loving the true self inside you is to love Master Dang and I am really happy about it. It is simple to show your love towards me. You can do it by transferring energy to help all living creatures to evolve. It is also easy to meet me. You can do it by seeing each other to exchange knowledge in UE learning because my soul will right there with you during that moment.

You do not have any sin when you cannot accept the facts about your life. If there is a sin, it would be the fault of the Beings in the past that did not complete their missions in training you and they bring these objective circumstances to you. In the past they only taught you in theory and you did not learn through the lessons of spiritual applications. Now, these Beings are also learning with you. I mean to say that nowadays there are many High Beings who came to earth. They also learn the lesson of expressing the true love from the Deities to “save humanity”. Otherwise, they cannot do it.

When you come to learn UE, it also means you bring the Being that you respect to learn the spiritual applications, in which they have learned the theory a long time ago already. I came to earth from a place very far away in order to carry out the mission of teaching UE, which is the lesson of spiritual applications. It is only this simple.

UE Student: UE applications of energy healing, improving agriculture production, or transferring energy to reduce catastrophe, in fact we are using the Divine capacity in our life. Are we doing something against nature? Why do we have to use this ability in the ordinary life of the majority of humanity at the present time? Can you discuss more about these issues?

Master: This is the first time I have heard this question. It is very profound and meaningful. I share with you my opinions so you can learn and progress!

The fact of your UE life is significant for you to learn. It is a fact that you can heal by using spiritual energy, or Universal Energy. It is a fact that you can grow rice without fertilizer or insecticide and still guarantee the yield to win the award of clean

rice in Vietnam in 2004. It is a fact that the bulbs from the antenna model lit up during the energy transfer in Australia, etc. Where does this energy come from? Why do you ask is it against the law of nature or not? This is a ridiculous and irrelevant question.

It is necessary to explain the meaning of the word capacity in this question. The capacity is the human latent ability, otherwise it is not true. You come to learn UE to receive the capacity from outside. Is that right? You are all wrong! This is a vague perception and reasoning that can lead you astray to go back to the old road of the Masters in Atlantis. If you want to use UE capacity to do something against the law of nature, the law of love, the law of compassion and the law of helping all living creatures to evolve, just for selfish personal interests then you will never get it. Suddenly all the UE techniques that I have taught will no longer be effective and you will face serious consequences.

To summarize this chapter, I want to emphasize several points so you can remember: the Deities' experiments on human culture in the world are always changing and in this direction they are improving towards perfection. You should not see the scientist's warnings about the earth's imminent catastrophes and be frightened. If you are afraid then what else can you do?

Realizing the truth about your life, your community, your country and the mother earth, in fact it is the most precious lesson about the truth. You are the Deities' children and you represent them to preserve the wisdom and enlightenment in your smallest living body, and that is the truth about your life. If you can only do that then all good things will come to you. The Deities do not abandon any one of their children even if they are stubborn or atheist. They are your true Deities. If we say they must follow in order to be saved, and for people who do not follow are not saved, then how can you convince the human race, how can you call them the Deities? You can consider this point and think carefully to avoid the case of the darkness covering your true self and it would be a waste of a whole lifetime of spiritual learning. I hope in this year, 2007, the future of the world will change toward a positive direction in the gratitude and appreciation we have for the Omnipotent. Everything depends on your effort of practicing and I am always nearby to help you overcome this final trial.

CHAPTER III

NEW PEOPLE – THE 'UNKNOWN'

UE Student: Dear Master, we need someone 'unknown' in order to have freedom to go and help sick people or solve the problems in human life. Can you elaborate this subject further for us?

Master: At one time I have said, “You and I are the unknown soldiers to help mankind and all living creatures to evolve.” I repeated it many times during the Oriental Philosophy Seminars. Today, through your question I want to share with you the latest information so you can learn.

I placed the Monument of Unknown Soldiers at the front outside the Altar of Mankind’s Ancestors in order to remember those who contributed to help this world throughout the ages. In any country there are heroes from one era to another, that people respected and built monuments to worship. There are places in which people built temples to worship these heroes just as Saints. The temple of Guan-Gong in various Chinese regions and the temple of Saint Tran Hung Dao in Vietnam are the examples.

World history is a history of wars. It seems that during this period of modern civilization, we have never had a time of world peace even for just one day. Everywhere we always have bombardments, gunfire and killing of innocent people. God built this world by creating humans and living creatures according to the Divine will, but why does God not allow humans to have peace? This is a question to put the blame on our stupidity.

In fact, the original model of human being is to be 'unknown'. Living creatures on earth during prehistoric times did not have wars. From the moment humans appeared with their discriminating mind, they recognized the differences between each other, and then they started to give names to each individual. If they stopped right at that point then nothing would happen. But because they abused the concept of 'possessing' material things, we had the beginning of a terrible ideology that philosophers refer to as 'individualism'. The role model of heroes was introduced with a good purpose so people can respect and follow them. But how can people fully learn everything from others when they share only a little in common. The circumstance of changes makes it even harder for them to learn from these apparent role models.

However, today we still need the role model of heroes because you can have an idea and decision to benefit the people and society. If you do not have the leadership of these heroes, then who will follow your ideology? In the Level 19, I said if you really love humanity then you should use the UE techniques to serve the world leaders, businessmen, clergy and scientists. Since they are working and representing God to manage humanity, they create many lessons according to God’s guidance and perhaps

they are not aware of it. You transfer energy to them to maintain their health and open their heart in order to make good decisions for the peace and happiness of mankind, without any other purpose.

History books allow us to see that these heroes always loved their own people and some of them were very humble and deserve the people's respect. The most important part is during their lifetimes none of these people imagined that they would become heroes or Saints. Through times the historians and scholars evaluated their lives. It is their job to create and make up these heroic images and give immortal names to these heroes. Furthermore, they even differentiate them according to various concepts of thinking, virtues, etc. In fact, they divided humanity according to the models that were created with real names and people. From that moment, there were 'anonymous people' who formed ideologies or organizations based on their own ways and associated them with these heroes or philosophers. Perhaps these things also happened in religion and science.

It is common to see one ideology, organization or religion criticizing the other. This is exactly the meaning of the crisis of earthquakes or tidal waves that happen in our mind.

Praising righteous people or good deeds and condemning evil people or sin is the 'principle' of linking a person with his actions, which the human race has used with the purpose of reaching goodness and perfection and staying away from bad habits. From a theoretical standpoint, this is a direction of progress. But to put into practice it is very difficult and challenging. Sometimes, we have to pay a costly price for it. Because in this process there is a 'discriminating factor' that hides underneath in which its action and motivation are very unfortunate.

Why? Today we criticize someone for doing bad things, but on the next day if he does something good, will we praise him or not? Praising or criticizing certain actions is alright; however we should think twice before praising or criticizing people, in order to avoid needless mistakes. This is the meaning of wisdom and enlightenment. This is also the foundation of tolerance, compassion and love for your fellows. I remind you of this so you can apply. We discuss bad or evil deeds with the intention of correcting them, and hopefully the next time these things do not happen again. But we should not judge or criticize someone for doing bad things. Because the more we criticize, the worse things they will do. This is a way we can convert evil to good and transform the darkness. We use the darkness as fuel to generate light for the new civilization. Without the opportunity to interact directly with them, you also had the UE formulas that I provided so you can transfer energy to them instead of talking and you can help them to progress better than you could have hoped for.

In your own eyes they may do bad things, but these persons are working for God without even realizing it. Why does God allow people to do evil? These evil deeds are lessons for the human race. Since humans have never learned from these bad mistakes, God created many lessons for us to learn. After we learn everything from these bad lessons then they are finished.

I mentioned to you that the soul does not eat food, wear clothing, have a name, or have ambitions or emotions. Therefore, the soul does not have any sin. This is a perspective of wisdom, enlightenment, compassion, love, tolerance and forgiveness.

In any human profession, if people can accept mistakes in order to analyze and learn from them, then the work can certainly develop. But it is deadly that we acknowledge good deeds and also praise the evil acts. We do not acknowledge our own mistakes. We try to hide them and make excuses to blame others. This is a very serious problem in the human race today, which causes so much suffering to people.

Learning from the good is much easier than from a bad situation. In the Vietnamese farming villages there is a saying, "A good flower naturally gives a sweet fragrance" and it means that if something is good then it automatically shines out without saying or advertising. Similarly for the UE Teaching, you do not have to advertise or say too much. If it is really good, effective and useful then it will automatically spread. I know however, that you learn UE and see that it changes your life. Since you love other people who are close to you, so you try to explain and convince them to learn, and there is no problem with that.

There are many heroes as role models but each person can select one to follow. This is a reason that causes the problems in our life. It started with the purpose of looking for a common role model from people who contributed to establish human civilization, in which the Altar of Mankind's Ancestors was created.

UE Student: Dear Master, to live as an 'unknown' person may sound easy but it is very difficult to do it. Can you share the experience so we can learn?

Master: Saying to live as an unknown may sound easy but now it is also easy to put into practice. It is not like the past because you have the tool I provided, which is the UE applications. During the beginning phase as you started to learn UE, many of you told me that it was difficult to criticize others and you did not feel encouraged when someone praised you. These things were not as important as before. This is the manifestation of your entity that was changing to non-entity, which is the Nonentity that is God. This is a simple way to measure your spiritual growth. If you still like to be well-known, to have my praise, to be near me, to always report to me with a sincere heart to contribute to UE then you still have a lot to learn. You should never try to build a name for the UE Teaching.

You should act and apply the UE techniques, and you will see the 'unknown' and 'invisible' effects of Universal Energy, which is the Deities' infinite energy of love, and how useful and beneficial it is to human life according to the transformation of entity to non-entity. This is a new lesson that I have received from the Deities in order to give to you at the present time and you should listen carefully and apply it.

The Altar of Mankind's Ancestors and Unknown Soldier's Monument in Australia is a physical image of the unity between the entities of humanity in the past with the Nonentity. When you transfer energy to any sacred places around the world,

you are inviting the 'entities' of the High Beings to the Altar of Mankind's Ancestor so they can learn the new spiritual lessons as well as the suffering problems of the human race that are now rapidly changing. If you transfer energy thinking that a certain location is evil or superstitious, then you violate the freedom rights of the Beings in this area. You should transfer energy with a mind of respectfully inviting them to cooperate with UE and come to be with us at the Altar of Mankind's Ancestors, then all the energy frequencies from this region will automatically come whether they want to or not.

The world is complex from an aspect of entity. The world is in harmony from a perspective of non-entity. A recognizable entity of a person is like gold. Now I help you to change this gold into diamond, can you do it? Or do you value this gold too much and do not wish to change it into something that is worth a thousand times more than you already have. The change here is your health, luck and happiness for your own self, family, community where you live, your country and humanity. I do not force you to throw away this gold, but I advise you to change it into something with newer value, newer spirituality, so that you become a newer person with newer lessons. This new value is priceless and it has no comparison. In fact you cannot even buy it with real gold or diamonds. That is the sense of peace, which is your health, your open mind and brilliant insight (intellect and love).

Today it is bad and tomorrow it is good. This is the nature of change. I often told you that change is the nature and motivation for spiritual evolution. With change you have everything. You should share your words through the questions during class as I mentioned that UE learning does not only involve healing but it has many more meanings to serve our evolution. That is the change of your viewpoint in harmony, clarity, wisdom and enlightenment.

You should not wait for any supernatural power to come when you practice and apply UE techniques. Instead, you should rely on humility and silently apply UE to help others. You perform the UE act as an unknown and the effective results are more than you can expect.

UE Teaching is a way of acting and learning to obtain wisdom and enlightenment through UE activities. I do not teach you abstract or difficult philosophy. Whatever human books claim is not our business. No matter how profound they may sound, without the spiritual energy to put them into practice then they are only theories.

UE Student: During the time of Buddha, Lao-Tzu introduced the “Yin-Yang” philosophy with the meaning that everything in the world contains two opposites such as Yin-Yang, white-black, right-wrong, good-evil, day-night, male-female, war-peace, happiness-suffering, etc. In a way, we always have a concept and another opposing concept, which contains all the conflicts and conflicts lead to struggle. This point is difficult for us to grasp. Can you teach us more about it?

Master: I just taught you the lesson of UE acts in the above question, and you ask me about the theory, a philosophical lesson about the 'Yin-Yang' principle that Lao-Tzu has introduced more than 2500 years ago. Alright, if you want to understand about the philosophy then I show you something new through this question so you can learn and progress. Everything contains two opposite sides of white-black. Humans have used them for a long time already and we did not see anybody progress. In fact, we are going backward instead.

I respect Lao-Tzu's contribution for mankind. But mankind does not fully understand this profound philosophy, so we made problems for ourselves over thousands of years. In fact, the disciples after Lao-Tzu rushed in to develop and apply this principle in their lives and in the same way science also does the same thing. The basic foundation of the Yin-Yang principle is the basis of many fields such as mathematics, chemistry, communications, etc.

The heart of the 'Yin-Yang' principle is the differentiation of matter. Everything happens with two opposite parts, but internally it is unity. What is contained inside? It is the spiritual and invisible energy that maintains the balance between these two opposite parts so they do not dominate each other in order to coexist in harmony. I always remind you that any thing or event on earth, as well as the activities in the universe cannot go beyond the controlling hand of the invisible Deities, which is the factor that keeps the harmony in all living creatures. There were Men who did not think of this "zero factor" of nonentity and claimed that they were Gods, and they were trapped in their mistakes and led the human race toward a wrong path of evolution.

In fact, these men did not understand the profound mind of the Creator and they tried to analyze these two opposite parts. They saw the positive parts as valuable and commercial so they used them, but the negative parts were discarded. Where would we throw them? There is nothing that can go beyond this universe. So these negative things that we discarded are still around and they increase each day to cause problems to the environment and imbalance in the amount of carbon on earth.

Regarding the social issues such as war, there are winners and losers. The Vietnamese ancestors have taught that "Victors became rulers and losers became rebels". The point was to remind their descendants not to fight but to try to live with each other in peace and harmony. In fact, that negative or evil side is still around and if you do not show compassion then they will become your enemies. Small fights will lead to large-scale battles and war. The racial struggles constantly happen throughout the long history of many thousand years.

UE Student: Dear Master, is there a spiritual battle in the invisible world? Why do we constantly have wars in this physical world?

Master: There is no war in the invisible world. If there is something, it is in fact the earthquake or tidal wave inside the human heart. Each night my ears often hear the cries from so many innocent victims of racial struggles and wars. You could see that at

the end of the Seminar, I usually sing for you and there were songs that carried sadness due to the darkness of humanity and the spiritual struggles inside the human heart.

I often said to you that humans just learned the 100th lesson about the truth. These men just learned about the 'Yin-Yang' principle and rushed down the mountain to apply it, so they could not avoid mistakes. I elaborate in general like that so you can easily receive the lesson of nonentity, and I do not intend to judge anybody. But you can still praise or apply any profound philosophy or good idea that you see, and if you are successful in bringing peace and happiness to the world then UE School will also 'seek to learn from this teacher'.

The spiritual leaders always bring out the reputation of humanity, a country or a community as the cause to start a war, but they never refer to their own reputation. When war breaks out, we all know the consequence and its remaining profits are the appearance of many heroes, which are the nature of fame in the material world. People worship these heroes or struggle to become heroes or to have this name, that title, etc. During the Three-Kingdom period in China, Guan-Gong carried his Blue Dragon Crescent Blade on his horse and heads rolled as he rode towards the enemy. The Chinese worshipped this General for his courage, righteousness and loyalty towards Liu-Bei that was regarded by the people during that time as the Divine Son who came down to fulfill God's decree.

What about the people who lost their heads such as Yan-Liang and Wen-Chou? There were also worshipped by the other side, too. So, what do you think? Both sides have their own reason. So the 'Yin-Yang' principle divides everything into two opposite parts, one right one wrong, how does it stand in this scenario? To grasp the profound meaning of Lao-Tzu's 'Yin-Yang' principle you have to learn the UE application from lesson 101 that I have taught, otherwise you cannot understand it. In life, there are always rights and wrongs. The strong people are always right and the weak ones are always wrong. Right and wrong are the concept that people created. But in God's spiritual world, which is a world of compassion, tolerance, forgiveness and true love, this concept does not exist.

It could be that humans are worshipping the image and mentality of these heroes. What kind of lesson about wisdom and enlightenment can we learn from wars? I only share so you know that these conflicts that can benefit certain people, organization or country are the causes of wars. Each side has all the reasons to convince people to start a war. But the lesson of wars is valuable in a sense that human love can be initiated and trained during the time of suffering. The Deities do not have this concept of wars; only humans have this concept in order to fully learn the lesson of love.

In fact, the title that you had to pay with people's blood to gain is still a bad lesson, but it is valuable in order to build real love. In my country, Vietnam, we constantly have wars so the Vietnamese people know more about the meaning of the lesson of love, and it is the basis of this nation's evolution. Vietnam will excel in many aspects and perhaps it will become the place to develop post-human civilization. The

Deities do not have a concept to select, but Vietnam meets the requirements to fully receive God's infinite love in order to develop and evolve to reach wisdom and enlightenment. This is my personal wish as a normal citizen of Vietnam.

Before starting the war, with the love for their people, these religious leaders should know how to sit down to analyze the property as well as personal damage. They can see the common ground, which is peace and love for all the families so everybody can evolve. Then, we would not have the tragedy of wars. They do not want to live in harmony, however and instead follow the dream of conquest to rule people or build a legacy for the ages, etc. The conflicts in this scenario can be seen through the changes in life style or society that people refer to as this or that revolution.

Nothing can escape the governing hands of God. We can solve the conflicts by understanding each other in order to help our progress and evolution. This is the path of a new revolution. The lesson we learn from never-ending wars. It is the Divine will during this final time of enlightenment for the human race. We can continue to live if we follow the Divine will. If we go against the Divine will, we will consequently destroy ourselves. Humans will decide their own fate.

To solve conflicts by fighting is perhaps a mistake that people who are famous heroes initiated. I remind you one more time so you can remember that the Deities, and the Most High have no entity. If you think differently, you should reconsider it. When God used the physical entities of these people in history to carry out the Divine will, then we have the names of these famous heroes.

Saying this does not mean that I tell you not to worship anybody, but I just remind that you need to correctly recognize the meaning of worship. You worship or respect the righteous mind and nature, which is the invisible support to help these heroes, philosophers, religious founders, scientists and those who made contributions to this world through the ages. This is the best meaning of philosophy and spirituality, that the Deities had revealed and allowed me to construct the Altar of Mankind's Ancestor in Australia.

On this point, I want to remind that for any kind of problems such as violating the spiritual freedom of another person, rivalry that leads to disharmony in the UE School, you should not report to me to settle it because there are the Unknown Soldiers at the Altar of Mankind's Ancestors who take care of it. Do not blame me because the Deities already decide it. If you violate it then you have to face the consequences.

I built the Altar of Mankind's Ancestors in Australia from the fees you paid during the Seminars, in order to remember the Invisible Beings who gave to mankind the people in every country around the world that made contributions to human civilization. With the wish to combine all the mental aspects, as well as past and present natures, to change to the spiritual aspects of nonentity, the ordinary name of this harmony is the 'Unknown Soldiers'. If they already had fame then they can be combined into the larger nonentity, which is the collective mind of mankind. This is the meaning of UE philosophy of harmony, holistic and nothingness.

Returning the real titles to these Divine Sons, who are the Unknown Soldiers, is a way to act and the means for us to merge with the mind, the values and the dreams of mankind in the past and present. To satisfy the opposite side, that also had their own famous heroes to establish the Yin-Yang harmony and build a foundation for peace, we should try to establish this harmony sooner. This is the common ground for the unity of Heaven-Earth-Man.

I acknowledge the contribution of many of you who voluntarily came to the Altar of Mankind's Ancestors in Australia by taking turns to stay and work. You have replaced me in taking care of the daily task of worshipping the origin of humanity. These are the acts of kindness with the love for the mother of the human race. It should be worthwhile for others to follow.

For many of you who wish to send offerings as a spiritual gesture, they may be small and not expensive, but they can improve the decoration of the Altar. Your wish has been granted and from now on I allow you to do it. The museum of Unknown Soldiers that I plan to build in the near future will be based on the ordinary spiritual souvenirs from every country and religion that you send to me from all Five Continents. Later on there will be other spiritual souvenirs that you send as offerings to the Altar.

UE Student: Dear Master, how should we organize humanitarian activities as a UE School to match the current situation with so many catastrophes that happen to mankind? Can you give us your guidance?

Master: I respect all the material and spiritual values that are created by scientists, capitalists, philosophers, clergy and politicians throughout the ages with the desire to contribute and build a position of unity with the Deities in order to reduce the (physical) damage from the needless problems such as natural disasters, earthquakes, tsunamis, epidemics, war and violence. My major concern is the storms and tidal waves that happen inside the human heart, (invisible nature) which can be greed, selfishness, hatred, jealousy, doubt, racial discrimination and division.

In fact, with the economic power nowadays from many countries around the world together with the compassion towards people, the international humanitarian support for the Asian tsunami victims in 2004 has shown that during the time of crisis, humans have sufficient capacity to help each other from a material aspect.

But how can we deal with the storms and tidal waves that happen inside the human heart? The only way to deal with this problem is by using a spiritual remedy. You have to change spiritually in order to successfully apply UE techniques. The spiritual change does not mean that you switch from your own religion to join the new 'UE religion'. The UE School is a field of spiritual and Universal Energy research and study. It does not link to any religion. It is normally a field of the spiritual science of UE (UE means people with energy which is God's energy).

You can see from practical experience that regardless of your own religion, you are all equal to each other as you come to learn UE and you treat each other with kindness. So, UE is the common ground for you. I am very happy to see the contribution you have made for our organization. Because your own religious founders asked me to help you to evolve spiritually and you are able to utilize spiritual energy to heal people who are sick and suffering. In a way you are presenting your religious founders to help your people escape from the temptation of the darkness. In fact, this is the way to apply the Buddhist principles or to preach the good news. Your religious founders will also feel happy and they will give a lot of blessings and support so you do not have any more worries.

If you can apply UE effectively, you should thank the Deities, Buddha, Christ, the Prophet, Saints and Angels who helped you. You should not thank me. I am only Master Dang who stays in the depth of nonentity within you and I am very happy.

I designed the tuition fees for UE Seminars because I want you to never depend on me, so you have total freedom to continue to learn and develop spiritually in UE or to deny it. This is a hidden point the Deities created to help bring you total freedom. I am your Master Dang and I am using the temporal impression of physical 'existence' in order to really bring you absolute freedom. If you see the benefits then you will learn, research and continue to progress. But if you see that UE Teaching is useless or ineffective then you can freely or automatically return back to the stage before you had your chakras opened, that's all. It is very simple. You are totally free to decide your own path.

Each day I can only eat several bowls of rice. My spending is quite simple just as other ordinary people. I use the money from the class to support the UE Spiritual Science development around the world, because I know money as the physical instrument still has its instant value. Money is still needed everywhere. I represent you to carry out this humanitarian effort. Since you and I are still ordinary people so the means of monetary support are still needed. I do not tell you to give money to charity. By myself, I represent all of you to do it and this is sufficient. The payment for UE courses is the contribution to the UE charity funds to help others with wisdom and enlightenment.

You should do charity work by using Universal Energy, which is infinite. But if you give money to charity then how much is enough? If you are poor you can still do charity work by transferring energy to disaster areas, to the sick people around you. That is charity work or even better.

UE Student: Dear Master, we tried to apply the concept of nonentity ourselves but it is very difficult and we could not achieve anything. Can you share your experience with us?

Master: To overcome the temptations of fame and fortune is something UE practitioners should do. You follow me to learn UE with this same purpose. Because if

you cannot surpass the framework of traditional values of fame and fortune then your results from UE applications will still be very limited. I cannot do anything else. I know I have to do something that in fact I do not want to do. So it is alright if any of you criticize me. Because the UE vocation that you and I follow is to obey the Divine guidance, which is to say what we see as shown through the Southerner's character in my own life.

I am glad that the Deities allow you to apply the UE techniques with many remarkable successes to serve humanity. The most significant one is the lesson 101 that human society recognizes. People fear my name and it is a very unfortunate mistake, because in fact I am a person with no name who came from the Mekong River in Vietnam.

I am talking about the subject of nonentity with you and everything I mentioned above is meaningful. If I wanted to use UE development for my own personal fame like other people, perhaps I would say there were so many opportunities to do it. I have shared with you in the Seminars that there were many invitations from wealthy people or countries, who wanted to use me and UE for personal interests, and they offered to give fame and fortune. If I accepted, I would be very famous. I did not accept, not because I did not like fame and fortune, but I usually could foresee that fame and fortune are temporal, names and titles are temporal, only nonentity is the real identity that the Deities give to people. With nonentity you have the capacity to help people. It is my vow and yours to be people with no name.

If you have a lot of money, a big castle or luxurious mansion, when you die can you bring any of it with you? People only hope to leave behind their names for others to remember. This is a serious mistake in humanity as we cause suffering to people who are still alive in the world. Why? Because through many eras and dynasties, how many good names were left behind? So, the majority of people who did not have these names or titles started to blame themselves as well as God for not being fair. Having no name to combine with the known name in order to become God's nonentity is the lesson I am teaching you today.

For those of you that I have authorized to represent me to teach the high level UE courses, you should listen: when you are conducting a class, I send the High Beings to help you to complete your duty. Upon the completing this duty, each of you go back to your own evolution path and you progress on your own learning ability. The High Beings cannot do it for you. I say it like this so you always show humility towards students in the lower levels. Certainly, when you are conducting the class you will have my special guidance and you can progress quite fast on your spiritual path. I remind you of this so you know there is nothing that can advance faster or benefit more than spiritual development.

I help you and walk together with you into the world of nonentity, which is the real name of people who are born the first time into the world. A newborn infant does not have a name and the child is innocent, natural and lovable. Afterwards, his parents

and family members raise him according to pre-arranged role models so this child can establish his name in order to satisfy their interests, but they keep on thinking that it is for the child's interest. This is a dangerous problem of education in several countries such as Vietnam, South Korea, etc. I know the children of UE practitioners in Vietnam who had to go to extra-curricular school right from Kindergarten. Who benefits from it? Was it for their parents or for them? You should give back the innocence and love to your children.

I also think of the fact that you use my photo and my name. I already reminded you in the class. Not only that, the Level 6, I allowed you to pray directly to help the wandering souls to return to the light without praying to me, do you remember it? Even then, I know everywhere you worship me and refer my name to this Being or that Being and sometimes you also borrow my name, too. Some of you also spread rumors that there will be many more High Beings who will be born, etc. This is superstition! You should respect me and return the soul of nonentity back to me. But if you still need to pray to me then you can do it, and there is no problem with it. But I want you to know that whenever you do not need to pray to me as you practice UE, I will be very happy because I see that you are mature.

I have said that eventually there will be many new Luong Minh Dangs who will come into the world. What does it mean? It does not mean there will be many whiz kids who naturally come to this world, but it will be the product of the activation of the God Gene that is hidden inside people by Universal Energy in order to have these geniuses. Are you not geniuses? I know when you come to learn the beginning UE courses in 3 days with only a total of simple 6 hours. Then afterwards you can transfer energy to heal the people who have severe health problems, as well as people who have false mental problems. If you are not the geniuses then who are you? You can think carefully about this fact.

You do not respect and appreciate the ability that is hidden inside, and you keep on looking for something abstract elsewhere, for some photographs with supernatural shadows, and you tell each other that it is the image of a ghost. If someone took a picture of a circular shadow then you said it was a High Being. How do you explain it? This is superstition. Whatever people tell each other about these spiritual phenomena is their own business and you should not even attempt to give any explanation because I do not teach you these things. I only teach you how to utilize spiritual energy to help yourself and others who are linked to you by fate and to help all living creature. But a number of you like to be famous, so you want to attempt to explain these spiritual phenomena to show that you have spiritual knowledge. You are making an unfortunate mistake.

When you apply the UE techniques successfully, it is a sign that you have grown in your spiritual energy. It is time that external influences cannot affect you anymore. It is the time your latent abilities inside are developed. It is the time the God Gene is planted in you. Consequently, you have wisdom and enlightenment to find out the

meaning of your true self, which is the 'nothingness' that is hidden inside your physical body.

Everybody has this latent ability. The question is, who can successfully utilize Universal Energy to activate it? I do not select any particular student to learn UE because I know spiritual energy and anti-matter energy is still hidden inside all the humans. I open chakras for you and it is a very important first step as I activate the immune capacity, spiritual energy, hidden love, hidden tolerance and hidden intellect for you.

I put it in simpler words so you can apply it: if you want to awaken the latent ability in people, then as a UE student you should pay attention to the 'no name' nature of the Deities who help you to utilize UE. You learn with humility; you do not boast your name; you silently provide unconditional service to help mankind; you respect all beings and the laws. If you do that, you already have 'no name'.

These points that I share with you here are the messages I send to you. If they are good, right and beneficial to you, then they only have momentary value. You should not see them as the truth. Because the truth is always changing and facts are always changing, since there are things the Deities do not allow you to know at this time. Learning UE is to learn about the changes in each second and minute to enhance the rate of human evolution to match the cycle in the universe, and to help mankind to have luck and happiness in order to preserve human civilization and the existence of all living creatures. So, we can reduce natural disasters and help this planet to always be blue in God's infinite and everlasting love.
